10. Design Review Standards. All commercial and recreational facilities shall be reviewed by the Community Development Director based on the following criteria. The Community Development Director may request technical assistance from an independent architect or other design expert in evaluating proposed developments in relation to these standards.
 - a. Facility design shall take maximum advantage of river views.
 - b. The height, mass, and scale of buildings shall be compatible with the site and adjoining buildings. Use of materials should promote harmony with surrounding structures and the character of the waterfront. The relationship between a building site and the historic buildings within the surrounding area shall be considered an integral part of planning for new construction.
 - c. The use of stylistic features characteristic of the historic Astoria area and the Pacific Northwest are preferred. This includes the use of natural wood siding such as clapboard, shingles or board and batten siding, pitched roofs, large overhangs, double hung windows, and similar features. Buildings shall be in earthtones, with bright or brilliant colors used only for accent. Buildings shall not create a false historical appearance of a previous period or era.
 - d. If the proposed project is large or situated so as to become an entrance or major focus of the City, the design will acknowledge the impact it would have on the entire community.
 - e. Monotony of design shall be avoided. Variety of detail, form and siting should be used to provide visual interest. Large expanses of blank walls shall only be located in areas which are not visible to the public.
 - f. Buildings should minimize the impact on views and vistas from surrounding or adjacent properties through orientation or location on the site.

Unlike the C-4 Zone, there are maximum lot coverage, landscaping, and off-street parking requirements for all uses.

2.390. USES PERMITTED OUTRIGHT.

The following uses and their accessory uses are permitted in a C-3 Zone if the Community Development Director determines that the uses will not violate standards referred to in Sections 2.400 through 2.415, additional Development Code provisions, the Comprehensive Plan, and other City laws:

4. Uses that are not water-dependent shall not preclude or conflict with existing or probable future water-dependent use on the site or in the vicinity.
5. No structure will exceed a height of 28 feet above the grade of adjacent shoreland, except for those areas between the extended 15th and 21st Street right-of-ways, and between the extended 6th Street right-of-way and the Astoria-Megler Bridge. In these two areas no structure shall exceed a height of 45 feet above the grade of adjacent shoreland.

 - b. Buildings shall be located as close to the bankline as practical, except where necessary to provide loading and unloading, or parking in accordance with 4.050, or to provide an aesthetic feature such as an open water area adjacent to the shore. This standard shall not be applicable to water dependent uses such as fish receiving stations which have a need to locate near deep water.
 - c. Buildings should minimize the impact of views on surrounding or adjacent properties through orientation or location on the site.
 - d. Buildings should be designed to relate to or connect with the street ends or public access points which they adjoin, unless there is a public safety or security issue which overrides this consideration. This connection can consist of the provision of decks, entrance ways, windows, retail sales facilities, eating or drinking establishments or similar facilities which enhance the waterfront setting.
 - e. Water oriented uses that provide the opportunity for the public to enjoy the waterfront for leisure and recreation shall occupy at least 75% of the ground level building facade facing the waterfront as measured in linear feet horizontally across the building wall. Water-oriented uses qualifying under this definition include parks, plazas, public seating, museums and other displays, resorts open to the public, aquariums, retail stores, and eating and drinking establishments open to the public.

A-3: AQUATIC CONSERVATION ZONE

2.575. PURPOSE AND AREAS INCLUDED.

The purpose of the Aquatic Conservation Zone (A-3) is to assure the conservation of: fish and wildlife habitats; essential properties of the estuarine resource (e.g., dynamic geological processes, continued biological productivity, unique or endemic communities of organisms, maintenance of species diversity); and the long-term use and conservation of renewable estuarine resources. This designation provides for development of low to moderate intensity that does not require major alterations of the estuary, with emphasis on maintaining estuarine natural resources and benefits. The Aquatic Conservation Zone includes small areas of tidal marsh and intertidal mud-sand flats, small fringing tidal marshes, and open water portions of the estuary and areas needed for recreational use. Partially altered estuarine areas adjacent to existing development of moderate intensity are also included in this designation, unless otherwise needed for preservation or development consistent with the need to minimize damage to the estuarine ecosystem.

Low to moderate intensity development is appropriate in Aquatic Conservation area designation (e.g., active restoration measure, communication facilities, and aquaculture). When consistent with the resource capabilities of the area and the purposes of the Aquatic Conservation Zone designation, conditional uses providing for development of moderate intensity are appropriate.
