Briefly address each of the following criteria: Use additional sheets if necessary.

11.030(A)(1) The use is appropriate at the proposed location. Several factors which should be considered in determining whether or not the use is appropriate include: accessibility for users (such as customers and employees); availability of similar existing uses; availability of other appropriately zoned sites; and the desirability of other suitably zoned sites for the use.

11.030(A)(2) An adequate site layout will be used for transportation activities. Consideration should be given to the suitability of any access points, on-site drives, parking, loading and unloading areas, refuse collection and disposal points, sidewalks, bike paths, or other transportation facilities. Suitability, in part, should be determined by the potential impact of these facilities on safety, traffic flow and control, and emergency vehicle movements.

11.030(A)(3) The use will not overburden water and sewer facilities, storm drainage, fire and police protection, or other utilities.

11.030(A)(4) The topography, soils, and other physical characteristics of the site are appropriate for the use. Where determined by the City Engineer, an engineering or geologic study by a qualified individual may be required prior to construction.

11.030(A)(5) The use contains an appropriate amount of landscaping, buffers, setbacks, berms or other separation from adjacent uses.

11.030(B) Housing developments will comply only with standards 2, 3, and 4 above.
